

What is claimed is:

1. A molded pet toy comprising:
a first interior section made of a material having a first hardness;
a second section lying exteriorly of said first section and integrally molded therewith
along a boundary, said second section being made of said material but having a second lower
5 hardness.

2. A pet toy, as claimed in claim 1, further comprising:
a third section lying exteriorly of said second section and integrally molded therewith
along a second boundary, said third section being made of said material but having a
different hardness than said first and second sections.

3. A pet toy, as claimed in claim 1, wherein:
said pet toy has a circular shape.

4. A pet toy, as claimed in claim 1, wherein:
said pet toy has a circular shape, and an annular lip formed about a periphery of said
pet toy.

5. A pet toy, as claimed in claim 4, wherein:
said circular shape comprises a body of said pet toy, and said annular lip extends
substantially perpendicular to said body.

6. A pet toy, as claimed in claim 1, wherein:

said pet toy has a circular shape, and a curve shaped cross-section.

7. A pet toy, as claimed in claim 1, wherein:

said pet toy includes three extensions substantially equally spaced from one another.

8. A pet toy, as claimed in claim 1, wherein:

said pet toy includes four extensions substantially equally spaced from one another.

9. A pet toy, as claimed in claim 1, wherein:

said pet toy includes first and second leg extensions resembling a boomerang.

10. A pet toy, as claimed in claim 1, further including:

a tag integrally molded with said pet toy.

11. A pet toy, as claimed in claim 1, wherein:

said pet toy is constructed of rubber.

12. A pet toy, as claimed in claim 11, wherein:

said rubber is selected from a group consisting of natural rubber, synthetic rubber and combinations of natural and synthetic rubber.

13. A pet toy, as claimed in claim 1, wherein:

said first and second sections are opaque.

14. A pet toy, as claimed in claim 1, wherein:

said first and second seconds are translucent.

15. A pet toy, as claimed in claim 1, wherein:

said first section has a first color, and said second section has a second different color.

16. A pet toy, as claimed in claim 1, wherein:

said first section has a first shape, and said section has a second shape which
symmetrically surrounds said first shape.

17. A pet toy, as claimed in claim 1, wherein:

said pet toy is constructed of plastic.

18. A method of manufacturing a pet toy, said method comprising the steps of:

providing a mold of a desired shape;

introducing a first material of a first hardness to a first interior portion of the mold;

introducing a second material of a second lower hardness to a second exteriorly lying

5 portion of the mold; and

conducting a molding operation to mold the toy wherein the first and second materials are bonded to one another along a boundary.

19. A method, as claimed in claim 18, wherein:

said molded pet toy has a circular shape.

20. A method, as claimed in claim 18, wherein:

said molded pet toy has a circular shape including an annular lip.

21. A method, as claimed in claim 18, wherein:

said molded pet toy includes three extensions substantially equally spaced from one another.

22. A method, as claimed in claim 18, wherein:

said molded pet toy includes four extensions substantially equally spaced from one another.

23. A method, as claimed in claim 18, wherein:

said molded pet toy includes first and second leg extensions resembling a boomerang.

24. A method, as claimed in claim 18, wherein:
said first material has a first color, and said second material has a second different
color.

25. A method, as claimed in claim 18, wherein:
said first and second materials are rubber.

26. A method, as claimed in claim 18, wherein:
said molding process is injection molding.

27. A method, as claimed in claim 18, wherein:
said molding process is compression molding.

28. A method, as claimed in claim 18, wherein:
said first material forms a first section of the pet toy, and said second material forms
a second section of the pet toy, said first section being of a first shape, and said second
section being of a second shape symmetrically surrounding the first shape.

29. A pet toy, as claimed in claim 18, wherein:
said rubber is selected from a group consisting of natural rubber, synthetic rubber and
combinations of natural and synthetic rubber.

30. A pet toy, as claimed in claim 18, wherein:

said pet toy is constructed of plastic.

31. A pet toy comprising:

a first interior section made of a fabric material; and

5 a second section lying exteriorly of said first section and molded therewith along a boundary, said second section being made of a solid material selected from the group consisting of natural rubber, synthetic rubber and thermo-plastics.

32. A pet toy, as claimed in claim 31 wherein:

said pet toy has a circular shape.

33. A pet toy, as claimed in claim 31, wherein:

said first section is circular in shape, and said second section concentrically surrounds

said first section, and said second section having a circular periphery.
